Checkpoint 6 13-01-2022

Mitran, Matei M.C. 3 days ago

What went well?

Everything went well this sprint. We worked both on the frontend and backend and managed to fulfill every promise for this final sprint. I think we all did a good job and worked very hard during the holiday to put together this project. We also used the Jira Board more, something we neglected in previous sprints.

Zuurbier-Munneke, Nicole N. (Teacher) 3 days ago

Your demo went really well. Thanks for the explanation up front on how it would look like, that cleared things up un advance. It's also really nice most of you had their cameras on, so we could see who was talking.

Your site looked professional and the PO was really happy with it. Please zip your code, create a (small) hand-over document and send this together with your presentation and documentation (you can delete the personal stuff like retrospectives of course) to Dennis (with me in CC).

If you have any improvements for the project or semester, you can let me know (if it involves the project, you can also let Dennis know personally, or let me know and I will make sure Dennis receives the feedback anonymously).

Checkpoint 5 16-12-2021

Mitran, Matei M.C. a month ago

Mostly everything went well this sprint, we worked on the backend and frontend and managed to fulfill everything we planned but one thing (uploading a package). We also managed to deliver the things missing in the last sprint.

What went wrong?

What went well?

Even though we communicate frequently and we know what every person has worked on, we neglect the Jira board.

What should we improve as a group?

Working more on Jira Board.

Zuurbier-Munneke, Nicole N. (Teacher) a month ago Quite a lot of you do not enter any peer feedpulse. Please, as requested before, still do so at least for last sprint.

Checkpoint 4 02-12-2021

Zuurbier-Munneke, Nicole N. (Teacher) a month ago Plan is to keep the jira board up to date better than previous sprints. The deliverables were still missing, they will be submitted today. Demo on Monday was going well.

A No feedback submitted.

Checkpoint 3 24-11-2021

Mitran, Matei M.C. 2 months ago What went well?

Mostly everything went well this sprint, we worked on the backend and frontend and managed to connect them so we can show a minimum viable product.

What went wrong?

The thing that went wrong is because of personal issues and corona, we could not meet a lot so we had to communicate using Whatsapp or Microsoft Teams. However, we still managed to get everything we planned done.

What should we improve as a group?

Similar to the last sprint, communication is not the best due to personal issues and we could try a bit harder to improve that.

Checkpoint 2 04-11-2021

Mitran, Matei M.C. 2 months ago What went well?

The demo went great and everyone worked on something and we could show a minimal viable product.

What went wrong?

The thing that went wrong is that because of personal issues, we did not have time to connect the front end to the backend and we had to show static pages and api calls from postman but for the next sprint, this will be resolved.

What should we improve as a group?

As a group we communicate often and everyone does their part but because of some personal issues this sprint we could not spend that much time together and had to work from a distance which proved to be a bit more challenging.

How was the communication?

We all communicated using Microsoft Teams and Whatsapp and we all shared our ideas. Even though we have different cultures in this team, we get along perfectly.

Zuurbier-Munneke, Nicole N. (Teacher) 2 months ago You had a good demo, keep this up!

Things to start/improve:

- story points for every story
- testing should be done before the story can be closed
- add reports to Jira board

Checkpoint 1 07-10-2021

Niţu, Ana A.M. 3 months ago What went well?

The demo presentation went well and we managed to split our tasks evenly. The approach and communication for the major decisions regarding the frontend and backend went smoothly. We managed to complete every task that we had planned for this sprint and decide what should we work on for the next sprint.

What went wrong?

The thing that we need to improve is the way we use Jira Software and being more organized on the backlog.

What should we improve as a group?

We are a well structured group, and we all understand each other's strengths and weaknesses. Maybe we need to spend more time together in order to understand the workflow of each of the group peers. We also need to have a better communication with our teacher and to receive feedback frequently and to know what should we work more on.

How was the communication?

Everyone was communicating and contributing to the general state of the group project. We mainly used WhatsApp for planning meetings and discussing

the issues and the progress.
